(1) If the device may not cause harmful interference to radio equipment in the vicinity of the device.

(2) If the device may accept harmful interference from radio equipment in the vicinity of the device.

Interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

• Relocate or reorient the receiving antenna.

• Increase the separation between the equipment and receiver.

• Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

• Consult the dealer or an experienced radio/TV technician for help.

SAR tests: The Compliant statement operating power is determined by the FCC with the same horn antenna of highest frequency and if not determined once used in accordance with part 15 of the FCC Rules.

The SAR is determined by the highest certified power level, although the SAR of the phone while operating can be well below the maximum value. In general, the closer you are to a wireless base station antenna, the lower the power output.

Before a new model phone is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the exposure limits established by the FCC. Tests for each phone are performed in positions and locations (e.g. at the ear and worn on the body) as required by the FCC.

For body worn operation, this model phone has been tested and meets the FCC RF exposure guidelines when used with an accessory designated for this product or when used with an accessory that contains no metal and that positions the handset a minimum of 5mm from the body.

Non-compliance with the above restrictions may result in violation of RF exposure guidelines.

### 2.4.Sentbox

When you send a message successfully,The phone stores the message in the sentbox folder.

### 2.5.Drafts

When you save a message you have written,The phone stores the message in the drafts folder.
